MAIN PURPOSE OF BACK-END

Unified point for collecting, routing and managing customer purchases. Build as SaaS single instance service, that can support all Wirecard customers, with centralized maintenance and support. As it offer generic API it can be integrated by any customer directly, through SDK or White label application, depending on preference. This allows freedom to customize Wirecard offering and freedom to integrate any Payment Gateway based on specific preferences.

wirecard epos

Wirecard ePOS is an unique CASHIER SOLUTION designed for maximal performance, scalability, ease of use and quick integration with all major technologies.

KEY USE CASES

Wirecard ePOS
Start accepting payments now. Use our Wirecard ePOS application right away without any development overhead.

WHITELABEL branded app
All partners wishing to provide payment solution under their name and brand, can do without additional development efforts.

SDK
If you have an application, extend it by easily implementing payments using Wirecard ePOS SDK

SERVER API
Having your own development team lets you also integrate with the Switch backend directly thanks to ready to use public APIs supporting all Switch features

GIFT CARDS
Larger merchants are using our gift card issuing and payment solution. This feature is available upon request.

ADVANCED REST API
All backend features are exposed via REST API services protected by authentication. Integrating partners can reveal/play with services via Swagger client on publicly available testing environment. Testing and integration environments for partners are available to connect directly to server.

ERP and E-COMMERCE
Wirecard ePOS back-end is capable of connecting to ERP systems, including SAP Business by Design, and e-commerce solution for automatic sync of inventory and Sale notifications back to ERP with Products stock, Cashiers activity and Customers tracking.

MAIN MOBILE PLATFORMS AVAILABLE
Wirecard is providing SDK for Android, iOS and Windows 10*. SDK provides easy way for customers to integrate payments into their existing or new in-house applications, keeping payment powerhouse supported by Wirecard at all times.

EASILY BRANDED WHITELABEL SOLUTION
For merchants who do not wish to spend time developing their payment solution and would like to have their branded payment application in place as soon as possible, Wirecard is providing Whitelabel application, that can be easily branded with required names, logos and color themes to match merchants needs.

COMPREHENSIVE DOCUMENTATION
All the product features are thoroughly documented providing comprehensive help on integration on any chosen level.
